CAD Designers Wireless Telecom Introduction Cover Letter

Wireless Telecom Drafting/Drawing Services:

CAD Designers has been in business since 1999. We specialize in and have a wide range of experience with the Wireless Telecom Industry including the development of Lease Exhibits, Construction Drawings, Site Mods, Structural Mods, Collocations, Monopoles, Lattice Towers, Guyed Towers, Rooftops and Water Tanks. Drawings are produced to the standards specified by our clients. Our goal is not only to meet, but always exceed your expectations. We charge a flat fee for each service, which includes redlines, or provide an hourly rate. Most projects carry a 5 business day guarantee. All work is completed by our drafting team, which is based in Raleigh, North Carolina, serving clients nationwide. We work in AutoCAD and deliver native DWG files with PDFs.

- **Sirius XM**
- **NYC 5 Boroughs FDNY, DOB, LPC**

CAD Designers has been a dependable wireless telecom drafting partner providing professional services at a competitive price. In today's economic climate, contracting your drafting needs is smart business. While many of our larger clients utilize CAD Designers as an overflow solution, our smaller clients tend to use CAD Designers for all of their drafting needs. Outsourcing your drafting to CAD Designers can save your company money by not having to direct-hire additional staff at times of economic uncertainty. When the need arises, we can help you complete your project without adding any long-term overhead costs.

We take pride in our QA/QC program. We ensure that each project is thoroughly reviewed and correct prior to being delivered to our clients. It is our goal to minimize revisions, which shortens the overall project schedule. This can be done by properly preparing before each project begins. We have an initial kickoff meeting with all of our clients so that we may completely understand their goals, objectives and preferred drawing formats. As we complete a few projects for our clients, the revisions are reduced to a minimum. All redline deliverables carry a 1 business day guarantee. It is our goal to give you a final product that meets your objectives on a fast-paced timeline. Send me your scope, software and deadline, and I will reply by the next business day.

Thank you for your consideration,

Charlie Seymour
